

**SHERWOOD LAKE ASSOCIATION
LAKE MAINTENANCE REPORT
FEBRUARY 2022**

The lights on fountain #3 were removed and replaced under warranty. The majority of our lights and fountains are relatively new and hopefully we will not have any breakdowns for the foreseeable future.

I am happy to report multiple wood duck sightings in the past week. These birds are truly beautiful to watch as they swim around in our lake.

We encourage bulkhead replacement or repair if needed. A properly working structure not only adds value to your property, but it keeps your yard from eroding into the lake and makes it harder for the nutria to live there.

Please inform your lawn crews that any trash blown into the storm drains goes directly into the lake with the first heavy rainfall!!

Be careful when applying lawn fertilizers, that they are not easily washed into the lake. City and University lakes are a prime example of algae bloom due to excessive fertilizer.

Please continue to clean up any trash that may be floating by your property. Thank You to our neighbors who lend a hand at keeping our lake looking beautiful!

GOALS FOR 2022

1. Encourage Christmas decorations along the bulkheads and streets. Cazes
2. Reduce nuisance animal populations. (Ducks, beaver, and nutria). Hayes & Cazes
3. Find a person to clean floating debris from the lake.
4. Continue efforts to encourage residents to repair and/or install bulkheads. Cazes, Hayes
5. Craft and install several wood duck nesting boxes around the lake. (Replacement of previous locations). Cazes & Hayes
