

SHERWOOD LAKE ASSOCIATION LAKE MAINTENANCE REPORT

APRIL 2023

A SPECIAL THANKS to property owners who remove floating trash from near their property. Removing cups and bottles only takes a few minutes and makes your property look much better.

Our spring algae bloom seems to be occurring as it has in past years. The green water will be with us until we get enough rainfall to dilute it. Please be careful when applying lawn fertilizers.

We continue to encourage bulkhead replacement or repair if needed. A properly working structure not only adds value to your property, but it keeps your yard from eroding into the lake and makes it harder for the nutria to live there. **We now have an additional, more competitive contractor for bulkheads if you are thinking of replacing yours. Please contact me at 225-229-5971.**

Please inform your lawn crews that any trash blown into the storm drains goes directly into the lake with the first heavy rainfall!!

Please continue to clean up any trash that may be floating by your property. Thank You to our neighbors who lend a hand at keeping our lake looking beautiful!

GOALS FOR 2023

- 1. Continue efforts to encourage residents to repair and/or install bulkheads. Cazes, Hayes**
- 2. Monitor water conditions for algae bloom, weeds etc. Cazes, Hayes and Smith.**

**Jim Cazes
Lake Chairman**
