

SHERWOOD LAKE ASSOCIATION LAKE MAINTENANCE REPORT

JUNE 2023

Fountain #5 (ZZ property) has been replaced and moved to the northwest a few yards. Hopefully this will position it out of the direct flow of the upstream culverts.

Fountain #1 (closest to the club) is not working. The lights work but the pump does not. CCR has been contacted to evaluate the situation.

Lake water is looking very good despite the extreme heat. We will need to get weeds sprayed in the month.

We continue to encourage bulkhead replacement or repair if needed. A properly working structure not only adds value to your property, but it keeps your yard from eroding into the lake and makes it harder for the nutria to live there. **We now have an additional, more competitive contractor for bulkheads if you are thinking of replacing yours. Please contact me at 225-229-5971.**

Please inform your lawn crews that any trash blown into the storm drains goes directly into the lake with the first heavy rainfall!!

Please continue to clean up any trash that may be floating by your property. Thank You to our neighbors who lend a hand at keeping our lake looking beautiful!

GOALS FOR 2023

- 1. Continue efforts to encourage residents to repair and/or install bulkheads. Cazes, Hayes**
- 2. Monitor water conditions for algae bloom, weeds etc. Cazes, Hayes and Smith.**

**Jim Cazes
Lake Chairman**
